

STEPHANO

Integrated Services Ltd

INTRODUCTION – BUILDING BRIDGES

Lekki - Ikoyi Bridge, Lagos, Nigeria

Stephano Integrated Services Limited (SISL) RC 1539784, established April 2018 and registered in Nigeria in November 2018, is a company offering a diversity of services to meet new and emerging demands within the Energy sector.

SISL as a young player in the industry thrives on the committed and assiduous capabilities of its team and the vast experience of its founder, Dr. (AMBP) Stefano Piotti, a recipient of Shell Petroleum Project and Technology Performance Excellence Award – with over 35 years of experience in the contracting, power infrastructures and oil & gas industries - out of which he spent 23 years in Nigeria.

Our manner of approach is to identify the gap and create bridges that foster collaborations between local companies and facilitate local and international technical partnerships for efficient and successful execution of projects. SISL provides the necessary business development, marketing, management and technical consulting skills to create seamless and mutually beneficial alliances.

bridge [brij]

¹ noun : a structure spanning and providing passage over a river, chasm, road, or the like.

² noun : a connecting, transitional, or intermediate route or phase between two adjacent elements, activities, conditions, or the like.

³ verb : (to make a bridge or passage over, to span.

Project Management

SISL delivers comprehensive project management solutions, ensuring efficient and successful project execution, either in collaboration with clients or independently:

- ↳ **Strategic Planning**
- ↳ **Resource & Risk Management**
- ↳ **Execution & Monitoring**
- ↳ **Client Collaboration**

Business Development and Marketing Services

Driving business growth through strategic partnerships, data-driven planning, and smart market positioning.

Source and secure technical and financial partnerships to enhance capacity, competitiveness, and profitability.

Develop business reports: feasibility studies, plans, and strategies.

Identify new opportunities, craft market entry strategies, and promote businesses in niche markets for maximum visibility and impact.

Management Consultancy Services

- ⌘ Strategic Management
- ⌘ Financial Consulting
- ⌘ Contract Administration
- ⌘ Sales Agency
- ⌘ Digital Transformation Advisory
- ⌘ Project and Program Management

The background of the slide features a composite image. On the left, a hand is shown holding a complex, glowing white wireframe structure that resembles a modern architectural design or a molecular model. This structure is set against a backdrop of a city skyline at night, with various buildings and lights visible. The overall color palette is a mix of cool blues and purples from the city lights, and warmer, glowing whites and yellows from the wireframe and the hand's skin tone.

Mergers and Acquisition Advisory Services

SISL offers end-to-end M&A services to help businesses navigate mergers, acquisitions, and integrations:

- ✎ Strategy & Target Identification
- ✎ Valuation & Financial Advisory
- ✎ Due Diligence
- ✎ Deal Structuring & Negotiation
- ✎ Post-Merger Integration

A person wearing an orange safety suit and orange gloves is holding a yellow hard hat. The background is a blurred outdoor scene.

- Refurbishment

EXLOG

EXCELLENCE LOGGING

Excellence Logging is a specialist oilfield services company with a focus on providing customers safe, and more technically advanced geological, surface formation evaluation, drilling monitoring, and light well intervention services.

We provide specialized service products related to Slickline, Wireline, Coiled tubing and Production enhancement systems.

We also perform fishing operations and well head maintenance services.

Samic is a company specialized in the construction and assembly of industrial plants. Over the last 50 years it has been dedicated to the quality of its finished products, the development of its facilities and constant investment in the professional improvement and specialization of its employees.

Samic boasts of a technologically advanced production area, designed and dimensioned to allow for the realization and movement of constructions and assemblies up to a vertical elevation of more than 30 metres within production departments.

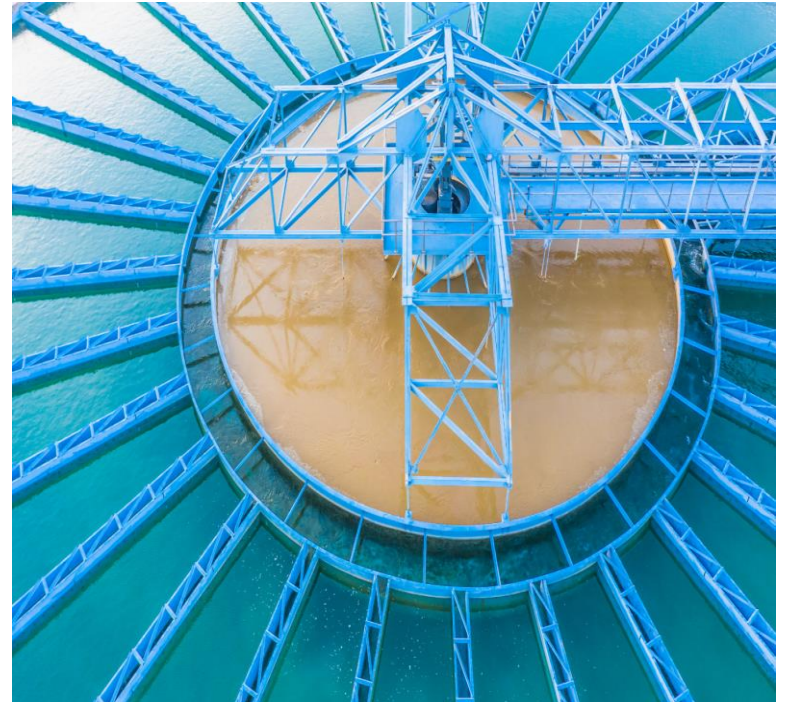

Samic's fully comprehensive production cycle includes engineering, component construction, welding, delivery, installation, inspection and testing and, if required, surface treatments and coatings.

Sodai S.p.A. is an **environmental engineering** and **water management** company operating in the purification and treatment of primary waters and process fluids sector.

What distinguishes us is our solid reputation and the quality of processes. In 2019 Italveco was incorporated into our group. Today we are present in 28 countries being proud of having in our portfolio leading companies operating in Oil, Gas and Power sectors,

At Sodai, we offer the study, design and construction of systems able to respond to different needs of the client in areasareas of:

- Desalination
- Potabilization
- Purification
- Water reuse
- Zero liquid discharge
- Treatment of process fluids.

Sicom Italia is an Italian company that supplies piping products in steel & special alloy steel materials for the energy, petrochemical, gas, oil, chemical and naval fields.

The "value" of the offered service, both for quality and for specialty of products, has always been the first target of SICOMITALIA, as well as having its own system of guarantee and quality certificate ISO 9001/2008 n. IT240536BV.

Reliability, quality, competence, combined to the most various range of piping offered, makes our company the best choice for demanding customers.

MARVAL MANAGING

BUSINESS CONSULTING EUROPE, MIDDLE EAST AND NORTH AMERICA

COMPANY PROFILE

Marval Managing has its headquarters in La Spezia, Italy and secondary office in Siracusa, Italy.

Marval Managing is a business consulting company acting as a support to Italian and European companies and provides them with commercial and technical assistance.

Marval Managing was founded in January 2017 in order to find Italian companies that want to develop their business abroad, so that they can be coordinated in marketing and commercial field.

The need for a company to be founded in Italy in order to operate in strict connection with our structures abroad is the result of our work carried out in the last years in terms of knowledge of the local markets, technical/commercial ability as well as the acknowledgement of our reliability by the Buyer and our European clients.

Our organization operates abroad through the support of some Partners and their structures in Nigeria, Morocco, Oman, Saudi Arabia and Bahrain.

We support our clients in the following fields of interest:

- Oil & Gas
- Power plants
- Water and wastewater treatment
- Waste
- Demil

ADVANCE ENGINEERING

STRUCTURAL CONSULTANT

Advance Engineering Consultant (AEC) is a company engaged in consultancy in Civil, Electrical, Mechanical, HVAC, Telecom and Instrumentation engineering. AEC was established in 1999 to develop consultancy services in India, Asia & Africa. The objective of AEC is to introduce the latest techniques, and to provide professional consultancy in multi-disciplinary areas of structural engineering, bridge engineering, highway engineering, traffic and transportation engineering, water resources engineering environmental engineering and engineering management.

AEC through its experience of more than two decades has acquired capabilities to undertake projects in different disciplines

The foundation of AEC's success is built on the talents and capabilities of its professional staff. Lasting success does not come up simply with the award of a consultancy work, but with consistent high-quality performance of a wide variety of technical and managerial tasks throughout the life of a project. AEC's recognition of this fact has enabled them to solve minor as well as major problems for our clients. The company is committed to quality service in the most effective manner.

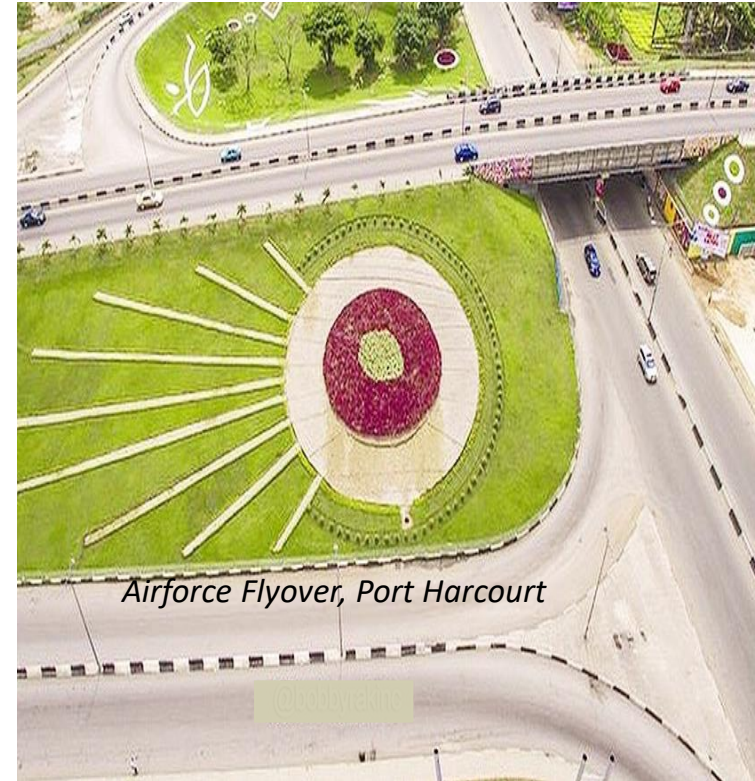

AEC through its experience of more than two decade has acquired capabilities to undertake projects in different disciplines.

Euro Pipeline Group design, manufacture and export a full range of pipeline equipment. EPE offers pipeline equipment **both for sale and for rental**. The array of products includes customized machines for laying, welding and bending of pipes, sandblasting, pressure testing as well as other mechanical units essential for realization of a pipeline.
